

# **Systems Engineering Transformation: Accelerating transformation to a model-based discipline**

Troy A. Peterson  
Assistant Director  
SE Transformation  
[troy.peterson@incose.org](mailto:troy.peterson@incose.org)

**System Elements & Interactions**

**External Elements & Interactions**

**Increased Density of System Elements & Interactions**

**Increased Density of System External Elements & Interactions**

**Increased Interactions Between External Elements**

**Expanding System Domain Boundary Increasing Interactions**

## GROWTH IN THE INTERNET OF THINGS

THE NUMBER OF CONNECTED DEVICES WILL EXCEED **50 BILLION** BY 2020

This interconnected phenomena is ubiquitous, occurring across domains and with systems we use every day.

Nodes = 30, potential links = 435, unique configurations =  $2^{435}$

***Number of known atoms in the universe estimated between  $2^{158}$  and  $2^{246}$***

*“Today more and more design problems are reaching insoluble levels of complexity.”*

*“At the same time that problems increase in quantity, complexity and difficulty, they also change faster than before.”*

*“Trial-and-error design is an admirable method. But it is just real world trial and error which we are trying to replace by a symbolic method. Because trial and error is too expensive and too slow.”*

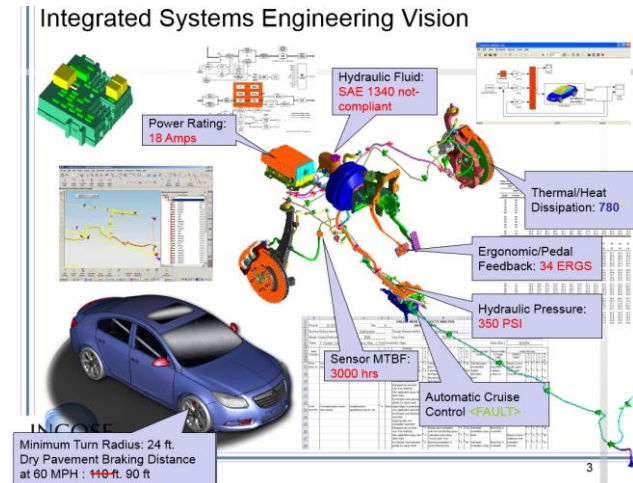

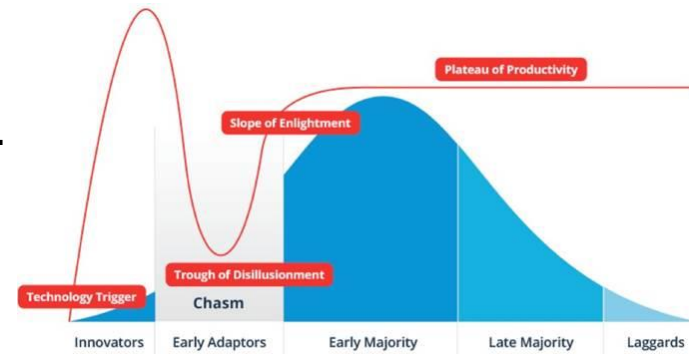

Christopher Alexander,  
*Notes on the Synthesis of Form*<sup>1</sup>,

1. Christopher Alexander, “Notes on the Synthesis of Form” Harvard University Press, Cambridge Massachusetts, 1964

## Objective:

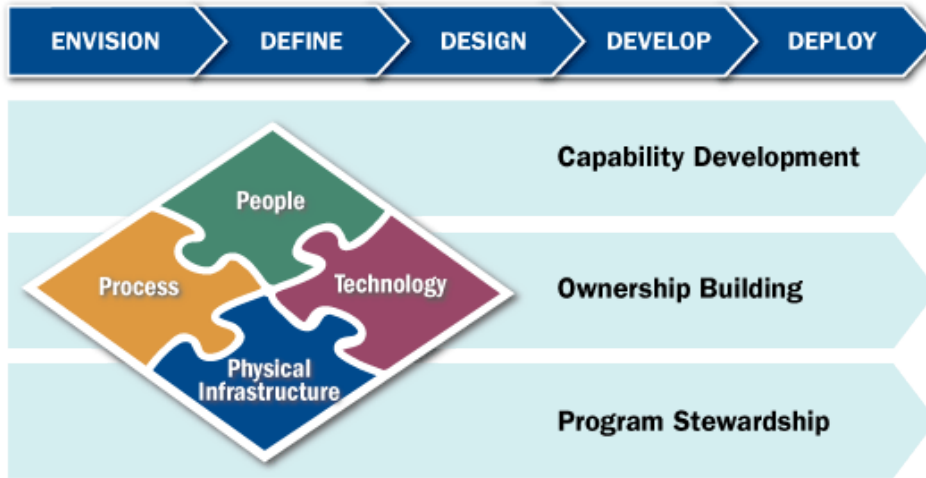

INCOSE accelerates the transformation of systems engineering to a model-based discipline.

- Accelerates:
  - Understand the hype cycle<sup>1</sup> and bridge the chasm<sup>2</sup>...
  - Empower others to enlighten and influence adoption
- Transformation:
  - A marked change, as in appearance or character, usually for the better<sup>3</sup>. e.g. documents to models
  - Lead and support the community in crossing the chasm
- Model Based Discipline
  - System models of all types
  - Modeler Collaboration and Model Integration

1. Hype Cycle is a branded graphical presentation developed and used by IT research and advisory firm Gartner  
2. Moore, Geoffrey A. "Crossing the Chasm – and Beyond" Strategic Management of Technology and Innovation Third Edition 1996  
3. Excerpted from The American Heritage Dictionary of the English Language, Third Edition 1996 by Houghton Mifflin Company  
4. Friedenthal, Sandy and Sampson, Mark - MBSE Initiative Overview - <http://www.omgwiki.org/MBSE/doku.php>

- Model Based Discipline
  - Models are not new to us
  - Transformation is not a wholesale change
  - Model based is the next evolutionary step
  - In some ways we're going "back to the future"
- Understand the Current State
  - Take inventory of current state of transition and progress toward becoming a model based discipline
- Envision and define the future state of SE:
  - Vision 2025, what are the business objectives, associated metrics, stakeholders, technology and transition needs, typical what if questions, priorities etc.
- Leverage Transformation and Change Management methods and frameworks

Transformation Life Cycle™ (TLC): Booz Allen Hamilton

Consider key dimensions of change

- People, Process, Technology, and Physical Infrastructure
  - Integrate dimensions of change
  - Addresses dimensions in parallel
  - Leverage concurrency to encourage cross dimension trades
  - Build ownership at the grass-root level

Consider:

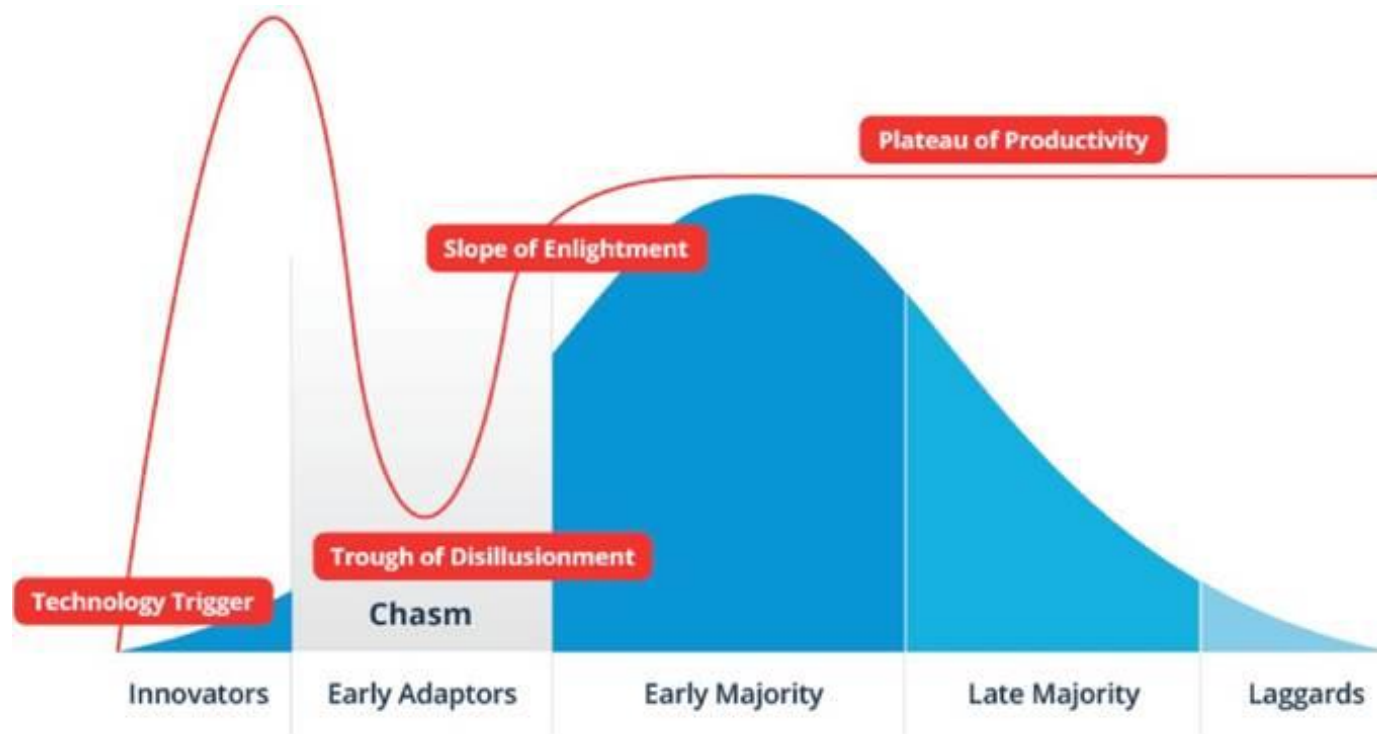

$$ABP = CM(OE + BPR + IT)$$

- ABP = Achieving Breakthrough Performance
- OE = Organizational Environment
- BPR = Business Process Reengineering
- IT = Information Technology
- CM = Change Management

Transformation is  
very much a people  
focused endeavor.

# Accelerates: Hype Cycle and Chasm

Acceleration is very much about sharing, communicating and learning

Where would you plot your organization today?

1. Hype Cycle is a branded graphical presentation developed and used by IT research and advisory firm Gartner
2. Hype Cycle Graphic: [https://en.wikipedia.org/wiki/Hype\\_cycle](https://en.wikipedia.org/wiki/Hype_cycle)
3. Moore, Geoffrey A. "Crossing the Chasm – and Beyond" Strategic Management of Technology and Innovation Third Edition 1996
4. Hype Cycle, Chasm Combind Graphic: <http://www.datameer.com/blog/big-data-analytics-perspectives/big-data-crossing-the-chasm-in-2013.html>

<https://redapplemom.files.wordpress.com/2011/06/change-cartoon1.jpg>

***If you want to truly understand something – try to change it.***

**Kurt Lewin**

***The best way to manage change is to create it.***

**Peter Drucker**

## **From:**

Model-based systems engineering has grown in popularity as a way to deal with the limitations of document-based approaches, but is still in an early stage of maturity similar to the early days of CAD/CAE.

## **To:**

Formal systems modeling is standard practice for specifying, analyzing, designing, and verifying systems, and is fully integrated with other engineering models. System models are adapted to the application domain, and include a broad spectrum of models for representing all aspects of systems. The use of internet-driven knowledge representation and immersive technologies enable highly efficient and shared human understanding of systems in a virtual environment that span the full life cycle from concept through development, manufacturing, operations, and support.

## Objective: Accelerate the transformation to a model-based discipline

- Advance and mature the MBSE Practice
- Mainstream Model Based Systems Engineering
- Evolve to a cohesive MBSE language, applicable to multiple domains
- Promote and advance the role of MBSE in global Model Based Engineering (MBE)
- Connect to other MBE cross domain standards like Building Information Modeling (BIM)
- Get authoritative information on MBSE out to practitioners and the broader community
- Align with SE Vision 2025 (see page 38-39)

<b>Strengths (current)</b>	<b>Weaknesses (current)</b>
<ul style="list-style-type: none"><li>- Strong interest in current MBSE initiative. Momentum created</li><li>- SysML Standard and Development</li><li>- High attendance at IW workshop</li><li>- Part of Vision 2025</li></ul>	<ul style="list-style-type: none"><li>- Perception that SysML <math>\equiv</math> MBSE</li><li>- Not fully integrated or accepted</li><li>- Limited spread to other WG activities</li><li>- Limited set of examples available</li><li>- Ad hoc application</li><li>- Building the theoretical foundation</li></ul>
<b>Opportunities (future)</b>	<b>Threats (future)</b>
<ul style="list-style-type: none"><li>- Mainstream Systems Engineering as a Model Based Discipline</li><li>- Connect to other MBE disciplines and take lead in integration</li><li>- Application across domains e.g. BIM</li><li>- Improve the overall business case for systems engineering</li></ul>	<ul style="list-style-type: none"><li>- Stove piping of MBSE</li><li>- Miss the larger community – stuck in the chasm / trough</li><li>- Other modelling communities pick up the lead for MBSE</li><li>- MBSE viewed as applicable only to large projects</li></ul>

## Assistant Director for Transforming SE to a Model Based Discipline

- Troy Peterson

## Core team of experts supporting the effort – Meet one or two times a month...

- Jeff Bergenthal
- Sandy Friedenthal
- Joachim Fuchs
- John Gill
- Mark Sampson
- Bill Schindel

## Adding stakeholder representatives to obtain diverse perspectives

- INCOSE CAB, IOB, Working Groups etc.
- Strong connection to the INCOSE MBSE Initiative
- Representatives from targeted MBE applications (NAFEMS, BIM, ....)
- Domain representatives

***Please let me know if you are interested***

- Strategy and Plan for Transformation
  - Vision, mission, goals, objectives, tasks and associated metrics
- Transformation Business Case / ROI Briefing
  - Collection of works to help make the case for transformation
  - Compelling Storylines and Case Studies
  - SE Transformation Principles (heuristics, lessons learned, best practices)
- Strategic Collaboration and Communication
  - Who all should INCOSE collaborate from a Transformation perspective
  - How do we better reach and communicate with stakeholders
- Invigorate and Integrate Working Groups
  - Help with modeling foundations – Ontology, Model Types/Taxonomy
  - Bring together our collective strength

## What Success looks like at IW 2016 and/or IS 2016

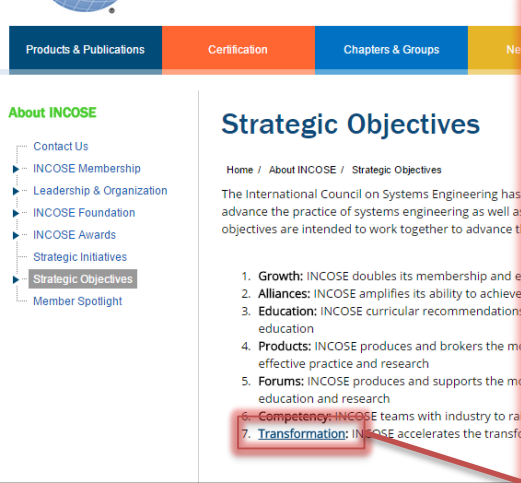

- New AD for transformation selected
- Strategy defined for implementing the Transformation
- First steps taken to mainstream MBSE
  - Partial MBSE workshop @ IW + MBSE topics addressed during (WG) meetings
  - Explicit have MBSE activities displayed during ongoing WG activities
- Work on explicit connecting products between MBSE and NAFEMS as well as the Building Information Modeling

## What Success looks like at the end of 2019 (5 years)

- Decision makers ask for models rather than documents
- MBSE is not a separate track at IS and IW but integrated in all WG activities
- Systems Engineering is a Model Based discipline, explicitly connected to X# of MBE applications

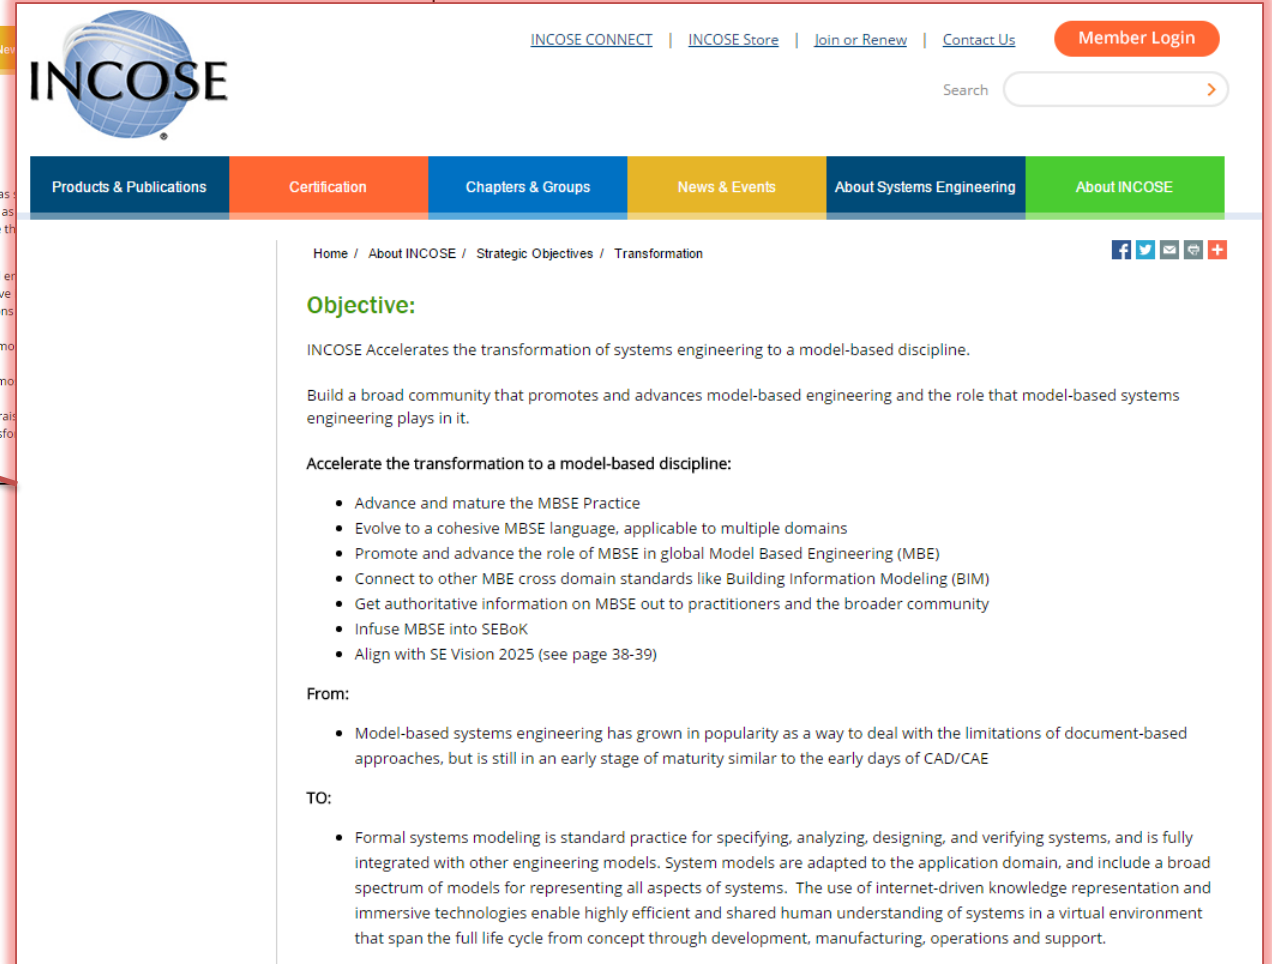

***I think we can do more!***

# Accomplishments: Transformation Page

Will update with developed strategy, new products created etc.

## Metrics on the new MBSE Workshop format

- 30+ model based related sessions in MBSE Workshop
- 4 joint sessions (Patterns, SoS, PLE, Agile and NAFEMS)
- Almost half the present WGs have model content (15/34)
- Half of those with model content are new to the workshop
- Receive an additional 8 commitments for next year

## SYSTEMS

What is a system?  
 What systems are you a part of and what systems are a part of you?  
 What makes a system break down?  
 Challenge: How can systems change and adapt?

POSITIVE ATTITUDE	RESPECT/KINDNESS	HONESTY/INTEGRITY	RESPONSIBILITY/ACCOUNTABILITY
• Cooperation	• Caring	• Reliability	• Service
• Peacefulness	• Courtesy	• Justice	• Citizenship
• Perseverance	• Loyalty	• Trustworthiness	• Leadership
			• Patriotism

## PATTERNS

What is a pattern?  
 How do patterns help (you) to make predictions?  
 How do patterns influence behavior?

POSITIVE ATTITUDE	RESPECT/KINDNESS	HONESTY/INTEGRITY	RESPONSIBILITY/ACCOUNTABILITY
• Adaptability	• Courtesy	• Fairness	• Self-control
• Generosity	• Forgiveness	• Sincerity	• Initiative
• Patience	• Loyalty	• Reliability	• Judgment
			• Accountability

## INTERDEPENDENCE

What is interdependence?  
 How does interdependence play a role in my life at school, at home, and with friends?  
 In what ways can a person be interdependent and also be an individual? Is one more important than the other? Why or why not?

POSITIVE ATTITUDE	RESPECT/KINDNESS	HONESTY/INTEGRITY	RESPONSIBILITY/ACCOUNTABILITY
• Cooperation	• Caring	• Fairness	• Citizenship
• Gratitude	• Tolerance	• Justice	• Judgment
• Sportsmanship	• Loyalty	• Truthfulness	• Service
		• Reliability
